Quality

First-class granular, multi-layered blow extrusion plus our professional knowledge ensure **long-lasting** top quality!

Expertise

Over 25 years of experience make us experts in stretch film and provide the basis for your success!

Technology

Our unique adhesive technology ensures optimum sealing of the individual film layers – creating bales that are **actually** airtight!

Compatible with all balers

Whether round or square bales
– **lakufol** is compatible with all balers
– even at high pre-stretching levels!

Diversity

- available in white, green, olive or black
- available sizes: 500 mm or 750 mm, other sizes on request

Please contact us regarding the sizes you require!

Safety

- guaranteed UV-resistance: 12 months at 110 kLy/p.a.
- Optimum mechanical properties!
- Weatherproof plastic cores!
- High-quality repackaging and palletizing!
- DIN ISO 9001-2008 accredited

Flexibility

Our reliable sales partners ensure:

- quick availability
- professional order processing

Service

However, if problems should actually occur, each roll can be backtracked by its individual production code. Our specially trained employees can be contacted for technical questions at all times.

Location Germany

Consistent quality at the highest level!
